PROFESSIONAL SUMMARY

Frontend-focused Computer Science undergraduate with hands-on experience building responsive, modern web applications using React.js and Next.js. Strong in frontend architecture, UI/UX, responsive design and interactive interfaces, with working knowledge of Node.js, Express.js, databases, APIs and authentication. Experienced in integrating AI/ML, real-time communication and modern web technologies through projects spanning healthcare, cybersecurity, AI assistants and web platforms.

TECHNICAL SKILLS

Languages: Java, Python, C, C++

Frontend: HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, Framer Motion, Responsive UI/UX

Backend & APIs: Node.js, Express.js, Firebase, REST APIs, Authentication

Databases & Tools: MongoDB, PostgreSQL, Prisma, Git, GitHub, Vercel, VS Code

AI/ML: Scikit-learn, Pandas, NumPy, Machine Learning, Data Analysis, Model Evaluation

Other: WebRTC, Razorpay, Figma/Canva

Core Concepts: Data Structures & Algorithms (DSA), Problem Solving

PROJECTS

JeevanJyoti – AI-Powered Rural Telemedicine Platform

[GitHub: telemedicine-rural-healthcare](#)

Tech: React.js, Node.js, Express.js, MongoDB, Python, Flask, Scikit-learn, WebRTC

- Developed responsive patient, doctor and admin interfaces for a multilingual telemedicine platform connecting rural patients with doctors.
- Integrated AI/ML-assisted symptom triage, Aarogya AI, voice input, real-time video consultation and analytics workflows.

CafeBuddy – Smart Cafeteria Web Application

[GitHub: cafeteria-app](#)

Tech: Next.js, React, Firebase, NextAuth, Razorpay, Zustand, Framer Motion

- Built a full-stack cafeteria platform with dynamic menu management, online ordering and payment workflows.
- Designed a responsive user-focused frontend and integrated authentication, state management and backend services.

Project Blackout – Controlled Cybersecurity Research Platform

[GitHub: Project-Blackout](#)

Tech: Next.js, Prisma, NextAuth, React, Framer Motion, PDF-lib

- Built a controlled cybersecurity research platform for web-based attack simulation, threat detection and security analysis.
- Developed full-stack workflows and an interactive frontend with authentication, database integration and security-focused simulation features.

VirtualBro – AI Desktop Assistant & Coding Copilot

[GitHub: VirtualBro](#)

Tech: React, Vite, Node.js, Express.js, Gemini API, OpenAI API, Framer Motion

- Built an AI-powered desktop assistant with conversational interaction and coding-copilot workflows.
- Implemented real-time system monitoring, desktop screenshot capture and terminal integration using a React frontend and Node/Express backend.

Stock Market Prediction using Machine Learning

[GitHub: stock-market-prediction](#)

Tech: Python, Pandas, NumPy, Scikit-learn, SMOTE, GridSearchCV, Matplotlib

- Developed an ML pipeline for stock-market prediction using technical features including moving averages, returns and volatility.
- Compared and tuned Logistic Regression, KNN, Decision Tree, SVM and Random Forest models using cross-validation and ROC-AUC evaluation.

EDUCATION

B.Tech in Computer Science (Core) – JK Lakshmipat University

2024 – 2028

CERTIFICATIONS

- Introduction to Python – Coursera
- Foundations of Web Development – Coursera

ACHIEVEMENTS & ACTIVITIES

- Participated in multiple college technical events and competitions; earned 2 certificates in college-level competitions.
- Actively building real-world projects that integrate AI capabilities with web development.

LANGUAGES
